### Letter from the Board of Directors

The Board of Directors is proud to be a part of yet another great year for the Richmond Ambulance Authority (RAA). Our Board includes volunteers from an array of diverse professional backgrounds who share the core mission that has remained constant since the Authority's creation back in 1991 – providing oversight and guidance to the RAA staff for the consistent delivery of excellent patient care while maintaining our commitment to economic efficiency to the Richmond community. In 2019, we welcomed new members to our Board: Ms. Julia Hammond, Dr. Michael Kelly and Ms. Sheldon Barr. They each bring a wealth of knowledge in their respective fields as well as provide a unique perspective to help move RAA forward in 2020 and beyond.

RAA's commitment to Richmond's citizens and visitors has always been at the forefront of our organization. Our staff has successfully trained thousands in hands-only cardiopulmonary resuscitation (CPR) free of charge, which covers the basics of this invaluable lifesaving skill. We also continued the "Stop the Bleed" training for Richmond Public Schools' staff. This is part of a campaign launched in 2015 to build skills among the general public that allow them to "stop the bleed" in the case of a severe bleeding injury. The course empowers participants to make a life or death difference when a bleeding emergency occurs until EMS arrives. In 2019, RAA participated in a variety of community events and career fairs to help raise awareness about healthcare topics. This participation is aimed to assist the public with their personal decisions regarding their health and the health of their loved ones. RAA remains vigilant in joining efforts with our public safety partners as we work together to combat the ongoing opioid epidemic crisis. In late August, RAA announced the launch of a new program in partnership with the Richmond City Health District (RCHD) called, "First Responders for Recovery," which is an evidence-based program aimed at connecting addicts to recovery resources in the metro-Richmond area.

Our reputation as a leading EMS agency is predicated on the perception of the people we serve. An outside company measures and tracks RAA's patient satisfaction results, and we are proud to report the overall score for 2019 was 98%. This is a direct reflection on our vow to the community. Providing excellent EMS care while assuring financial accountability to the people we serve is paramount. In November, RAA received another "clean audit," report from our outside audit firm (for Fiscal Year 2019) as well as having ended the last fiscal year with net service revenues and expenses both favorable to budget. The current fiscal year now halfway complete - is also favorable to budget. Remaining good stewards of the City funding we receive is critical in upholding the public's trust.

As we look back on 2019, we can reflect on a number of noteworthy accomplishments our Board has been a part of and are eager to assist the RAA team with making many more success stories in 2020 and beyond!

### Operational Medical Director's Report

# Naloxone Drone Delivery to Bystanders at the Scene of an Unconscious Opioid Overdose Victim

We are in an opioid crisis killing >63,000 Americans a year. An opioid overdose (OD) kills by causing the victim to stop breathing and, within 2-5 minutes, if not reversed by a naloxone antidote, the heart stops beating resulting in death. It is often not physically possible to get EMS responders to the scene to administer the naloxone antidote quickly enough to save some of these victims once they stop breathing.

We are making significant progress on the cutting edge research and emergency treatment collaboration between RAA and VCU's Department of Emergency Medicine and College of Engineering on an exciting project that we reported on last year. We have submitted a grant application to the NIH's National Institute of Drug abuse to develop and test the ability for seven of our RAA dispatchers to be trained as FAA-certified commercial drone pilots and deliver FDA-approved, intranasal spray naloxone antidote to bystander 9-1-1 callers at the scene of an opioid OD while our first responders and paramedics are racing to the victim. Just five drones placed throughout Richmond can deliver the antidote to the caller within 2 minutes or less. We have soon to be published data from a completed VCU simulation study showing that laypersons can fetch a drone from outside a building, return to the victim, and administer the antidote to a simulated manikin victim under RAA dispatcher direction in 2 minutes from 9-1-1 contact. Since EMS responders can't physically reach the victim until an average 8-9 minutes after dispatch, reversing the OD 5-6 minutes sooner has great potential to save more lives. The grant request got high marks on its initial NIH review, and we are waiting to hear whether NIH has enough funds available to get us started as early as July. Stay tuned for news on this exciting, first-of its kind, life-saving project!

### Extracorporeal Membrane Oxygenation Protocol for Cardiac Arrest

RAA fully implemented the Old Dominion EMS Alliance's (ODEMSA) regional protocol for treating selected patients with cardiac arrest who do not respond to initial resuscitation treatments such as defibrillation. Such patients are now transported with resuscitation to one of five Richmond-area hospitals that can now place them on a form of heart lung bypass in the Emergency Department, improving their odds of survival. We are one of only a half dozen systems in the United States that have such a program in place.

### Other Significant Developments

Eighteen paramedics and one EMT-Intermediate were successfully precepted and cleared into field service in 2019. Our patient safety initiative is still a model for the nation. In particular, our field providers generate a steady stream of "self-reports" and suggestions on improving the culture of safety. There is now clear proof that our system has a profound effect on safe patient care. For example, analysis of our data for the last five years indicates that our advanced life support providers make dramatically fewer errors (virtually all with no adverse safety consequences) than the best-trained intensive care unit nurses throughout the United States.

JOSEPH ORNATO, MD, FACP, FACC, FACEP

OPERATIONAL MEDICAL DIRECTOR

### Chief Executive Officer's Report

The Richmond Ambulance Authority (RAA) has seen its share of successes and accomplishments over the years, and 2019 proved to be no different. As Chief Executive Officer, I am fortunate to be leading such a dedicated group of individuals who pride themselves on delivering the highest quality of EMS care to the Richmond community.

RAA continues to be one of the busiest systems per capita, having responded to nearly 70,000 calls for service in 2019. This equates to 5,800 calls each month and 190 calls for service each day! Nonetheless, RAA's EMS crews rose to the occasion, meeting stringent response time standards, having arrived on scene to life-threatening emergencies within eight minutes and 59 seconds, 91% of the time. This means our crews arrived to our critical patients' side, on average, within five minutes and 33 seconds.

Recruiting and retaining the most qualified people possible continues to be a challenge for the public safety industry. Therefore, it remains RAA's main focus as we look for ways to better market our agency and attract the skilled individuals necessary to uphold RAA's reputation as a leading,

high performance system and assure our City continues to receive the very best prehospital care and clinical excellence. RAA recently launched a new program for individuals looking to start a career in EMS called the EMS Placement Program. "Cadets," as we refer to them, may have little to no EMS experience. They are provided the training and the opportunity to secure their EMT certification at no cost. We currently have seven cadets enrolled and look forward to seeing these individuals flourish as they work to pursue a career with RAA.

In 2019, RAA submitted its application to participate in the Centers for Medicare & Medicaid Services' (CMS) recently launched Emergency Triage, Treat and Transport (ET3) model. The ET3 model is a voluntary, five-year payment model that will provide greater flexibility to address emergency healthcare needs of Medicare beneficiaries following a 9-1-1 call. CMS will pay participating ambulance providers to: 1) transport to a hospital ED or other destination covered under the regulations, 2) transport to an alternative destination such as a primary care doctor's office or an urgent care clinic, or 3) provide treatment in place with a qualified healthcare practitioner, either on the scene or connected using telehealth.

RAA was fortunate to once again be the proud recipient of awards, both on an agency and individual level in 2019. In May, the American Heart Association awarded RAA with their Gold Award, having met all of the requirements under their program, "Mission: Lifeline," which was developed to help improve the quality of care for STEMI (ST Elevation Myocardial Infraction) patients. RAA's own Christina Austin, Communications Supervisor, walked away with the 2019 Old Dominion EMS Alliance (ODEMSA) Regional EMS Council Award in the category, Outstanding Contribution to EMS Telecommunications.

RAA continues to uphold its reputation, both nationally and internationally, having played host to a number of visitors from as far away as Egypt and as near as Roanoke, Virginia! We are proud and humbled to be considered a 'must-see," by our public safety partners around the globe as we all collaborate to improve upon each other's current best practices as well as the future direction of EMS care.

It took a team effort to make 2019 the success that it was, which includes the leadership and direction of our Board of Directors, the clinical expertise and guidance from our Operational Medical Director, Dr. Joseph Ornato, the ongoing support of the City of Richmond Administration and Richmond City Council, not to mention the hard work and commitment from every member of the RAA staff. Together, we can be very proud of our accomplishments in 2019 as we focus our efforts on another successful year in 2020

CHIP DECKER
CHIEF EXECUTIVE OFFICER

### 2019 News and Events

#### **JANUARY**

The Richmond Ambulance Authority partnered with the American Red Cross to kick off the new year and hosted a blood drive for National Blood Donor Month. Staff and members of the public donated lifesaving blood during what is typically one of the most difficult times of the year to collect donations.

### **FEBRUARY**

In February, we welcomed paramedic students from universities across Australia. They got a tour of headquarters and learned about how RAA operates. We again taught Hands-Only CPR at the CBS6 Health and Fitness Expo. We also launched a new redesigned website to improve community interaction, customer service and public education.

#### **MARCH**

We hosted the Richmond Police Department's Latino Youth Academy and taught them Hands-Only CPR. We also took part in the March for Muscular Dystrophy with MDA Greater Virginia.

#### **APRIL**

In April, we joined our regional partners to participate in the **Triennial Emergency Response Exercise** at the Richmond International Airport. We also helped the Virginia Office of EMS with a mental health and wellness video PSA aimed at reducing first responder suicides.

### 2019 News and Events

### **MAY**

In May, the Richmond Ambulance Authority was presented with the American Heart Association's Mission: Lifeline Gold Award for outstanding performance delivering evidence based treatment to people who suffer heart attacks. We also joined public safety partners from across the region to help with a Move Over campaign.

#### JUNE

June is Hands-Only CPR and AED Awareness Month. RAA teamed up with the American Heart Association to demonstrate and give out over 200 Hands-Only CPR training kits at community events throughout the month. We also participated with our public safety partners in the Virginia Association for Pupil Transportation's "In an Instant Mock School Bus Crash" exercise.

#### JULY

In July, RAA joined former NFL player and Varina High School standout Michael Robinson to lead education and Hands-Only CPR training at his Excel 2 Excellence Coaches Clinic. We also partnered with Dominion Energy, American Red Cross, Richmond Police, and Richmond Fire to raise awareness regarding heat safety.

#### **AUGUST**

The Richmond Ambulance Authority announced a new partnership with the Richmond City Health District called "First Responders for Recovery" aimed at combating the opioid epidemic in the City. We celebrated with communities across Richmond for National Night Out.

### 2019 News and Events

#### **SEPTEMBER**

In September, RAA kicked off Child Passenger Safety Week by providing free Child Car Seat Safety Inspections at the Hispanic Parade and Festival. We joined Richmond leaders and first responders for a Day of Service and Remembrance ceremony recognizing 9/11.

#### **OCTOBER**

We had a blast at the Science Museum of Virginia's "Girls in Medicine Camp-In" as we gave young girls a tour of an ambulance and answered questions about EMS. We hosted nurses and employees from Sint Maarten as they learned more about our equipment, protocols and communications center.

### **NOVEMBER**

In November RAA joined the Secretary of Health and Human Resources, State Health Commissioner, and Richmond Mayor Levar Stoney to promote the flu vaccine. We also hosted the Richmond Police Department's Citizen's Police Academy and taught them more about RAA's system and Hands-Only CPR.

#### **DECEMBER**

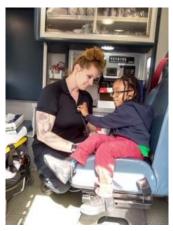

RAA launched a new partnership with the American Heart Association to offer free Hands-Only demonstrations and training kits. The training will take place at "The Market @ 25<sup>th</sup>" throughout the year. We spread holiday cheer at the 36<sup>th</sup> Annual Dominion Energy Christmas parade.

# Memorable Moments from 2019

### Our Visitors

General Practitioner Aya Elalem from Egypt

4<sup>th</sup> year General Surgery resident Cesar Sanchez from Mexico

Paramedic Students from Australian universities

5<sup>th</sup> year medical students Pablo Vasquez and Claudia Patino from Ecuador

Medical Student Ryana Roso from Brazil

Paramedic Shane Woodhouse from England

Paramedic David Steele from Colombia

## Agency Information

#### **OUR MISSION**

To deliver patient centered care through measurable clinical and operational excellence with efficiency, outstanding customer service and employee engagement.

#### **OUR VISION**

The Richmond Ambulance Authority is an industry leader, providing World Class mobile integrated healthcare.

#### **HISTORY**

In 1990 The Richmond City Council and the city manager recognized they needed to make drastic changes to the city's EMS system in order to ensure all city residents received the best and most effective care. On March 20, 1991, the Virginia General Assembly created the Richmond Ambulance Authority (RAA) and on September 23, 1991, the City of Richmond granted the franchise to RAA to provide EMS services to the City of Richmond.

Since its inception, the goal of the Richmond Ambulance Authority (RAA) has been to provide its community with clinical excellence, while ensuring response time reliability and fiscal responsibility. Although it has the highest call volume per capita in the United States, RAA has gained a national and international reputation as a premiere, high performing EMS system. RAA is one of only 32 systems in the United States that has received accreditation from both the national Commission on Accreditation of Ambulance Services (CAAS) and the International Academies of Emergency Dispatch (IAED). These accreditations are considered the "gold standard" for ambulance services, certifying distinction for quality patient care and ambulance operations.
